SUMMARY

I'm a Full-stack Developer specializing in front-end design and accessibility. I'm passionate about working quickly and efficiently, always aiming to improve and iterate. I've built a full-stack distributed system that made \$1K (80K INR) in monthly recurring revenue. I also enjoy contributing to open source projects and have made significant contributions to repositories like Podman, Containers and Http-rs.

work experience

Cashcowlabs.io, Full Stack Jun 2024 - Present

- Created a unified distributed system for internal sass that combines different workflows into a single board. We used Redis, BullMQ, Nextjs, Express, NextAuth & Supabase PostgreSQL.
- Streamlined project workflows, enhancing overall efficiency by 125%
- Used render.com native load balancing solution to auto scale as needed

Figuro.in, Frontend & Marketing Mar 2024 - Jun 2024

- Designed the Landing page using Nextjs & Figma
- Setup system to monitor customer conversion (Click Rate)
- Collaborated with the founder to work on their sass product
- Worked with marketing to develop workflow, for lead generation using "Beautiful Soup"

Cashcowlabs.io, Frontend Jan 2024 - March 2024

- Developed the Landing page using Nextjs
 - A solid 15% rise in conversion, due to increase in customer trust.
 - Collaborated closely with the founders to identify the key conversion drivers, enabling us to focus our efforts on enhancing these critical metrics.
